NUEPA has been involved in strengthening educational management information system for more than a decade. Initially the mandate was to develop a computerized information system for Primary level of education but was confined only to DPEP districts/states. While launching *Sarva Shiksha Abhiyan* in 2001, not only was the scope of DISE extended to the entire elementary level of education but its coverage was also expanded from the DPEP districts to the entire country. In 2005-06, all the districts were covered under DISE for the first time. With The Right to Education Act in 2009, the Data Capture Format of DISE was further modified. When *Rashtriya Madhyamik Shiksha Abhiyan* (RMSA) was launched, NUEPA extended coverage of DISE from the Elementary to Secondary and Higher Secondary levels of education and developed on-line software in 2007-08. However, in 2012-13, a single Data Capture Format was developed for the entire school education in view of which the DISE software was re-designed and information collected from more than 1.5 million schools.

Secondary Education in India, Flash Statistics: 2015-16 is based on data collected during U-DISE 2015-16 with 30<sup>th</sup> September, 2015 as date of reference. The document is based on the data received from as many as 252 thousand schools spread over 680 districts across 36 States & UTs. A study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am thankful to all the State Project Directors of SSA and RMSA, the state level EMIS Coordinators and district level Programmers and Data Entry Operators for supply of data.

I take this opportunity to thank UNICEF, Delhi, in particular Ms. Euphrates Gobina for consistently supporting EMIS activities ever since the inception of DISE and Secretary, Additional Secretary, Joint Secretary and Directors, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of U-DISE in various states.

I am thankful to Prof. Jandhyala B. G Tilak, Vice-Chancellor (I/C), NUEPA, for encouragement and guidance. I take this opportunity and thank NUEPA faculty for their support.

The contribution of Mr. Naveen Bhatia, Computer Programmer, NUEPA in database management and software development, is gratefully acknowledged. I am thankful to DISE project team at NUEPA especially Ms. Aparna Mookerjee, Consultant for computing indicators, Mr. Jay Prakash Gupta for graphs and Mr. Deepesh Kr. Singh for typesetting. I am also thankful to Mr Arun Joshi, Consultant (Publications, DISE Project) for timely bringing out the publication.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

# **One Million+ School Report Cards**

([www.schoolreportcards.in](http://www.schoolreportcards.in))

**Winner of Manthan Award South Asia 2010, e-Governance & eINDIA 2010 National Awards and EMPI-Indian Express Indian Innovation Award 2012**

The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). Off late, MIS for Secondary level of education has also been developed which covers both Secondary and Senior Secondary schools/sections of all the districts of the country. What is more remarkable about U-DISE is that it has drastically reduced the time-lag in availability of educational statistics which is now down from 7-8 years to less than a year at the national and only a few months at the district and state levels.

The National University has successfully developed School Report Cards of more than 1.45 million schools imparting Elementary education and about 244 thousand Secondary and Higher Secondary schools. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the click of a mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the country.
