Elementary Education in India: Trends

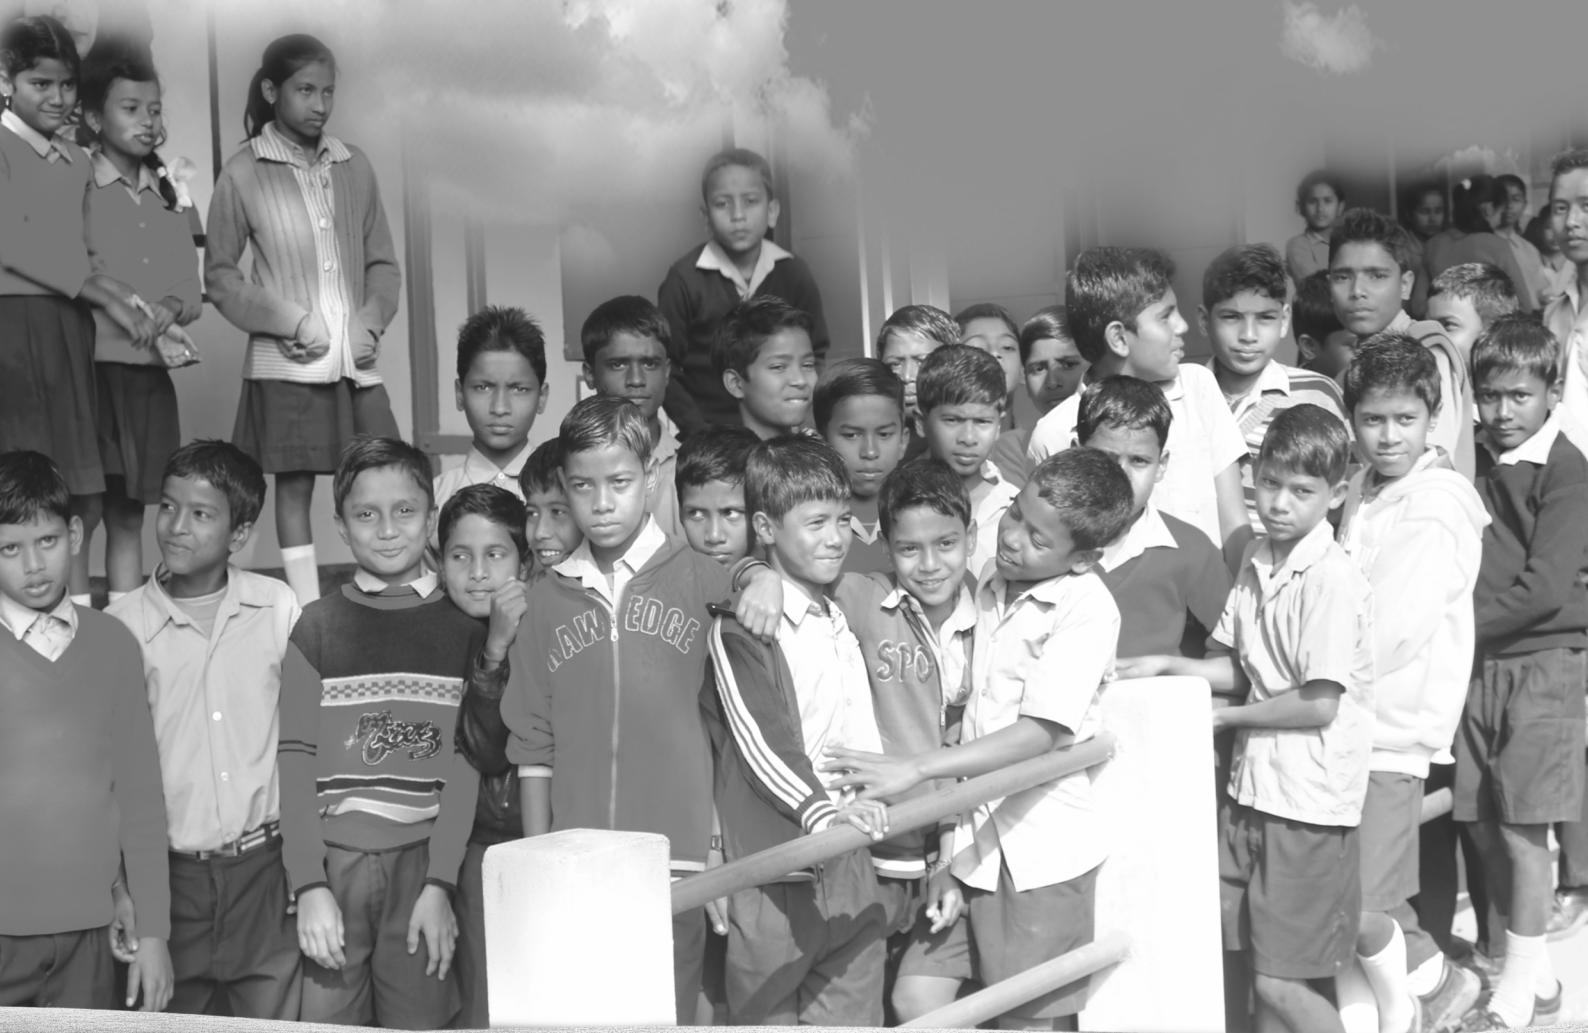

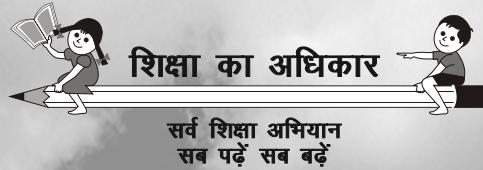

2005-06 to 2015-16

NATIONAL UNIVERSITY OF EDUCATIONAL PLANNING AND ADMINISTRATION

Acknowledgement

For the last several years, NUEPA has been actively involved in strengthening Educational Management Information System (EMIS) in the country. The Elementary Education in India: Trends is based on the data received from all the States & UTs of the country for the last ten years which is based on Flash Statistics during the period 2005-06 to 2015-16. It incorporates key indicators on all aspects of Universalisation of Elementary Education in case of all the States & UTs of the Country.

The current year i.e. 2015-16 is based on the data received from as many as 1.45 million schools spread over 680 districts across 36 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, for consistently supporting EMIS activities ever since the inception of DISE and Secretary, Additional Secretary, Joint Secretary, Director and MHRD who played a crucial role in facilitating the implementation of U-DISE in various states.

The contribution of Shri Naveen Bhatia, System Analyst, NUEPA in database management, is gratefully acknowledged. I am thankful to Ms Aseela M, Project Jr. Consultant (DISE Project) and other members of the DISE team at NUEPA for compiling indicators when have been presented in the document.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

New Delhi
August 2016

Disclaimer

Raw data presented in the document or used for calculating indicators are essentially based on data provided by the State and UTs through annual data collection (as on 30th September, different years). NUEPA is committed to provide professional and software support to all States and UTs as well as for dissemination and analysis of data as it is provided by the individual States and UTs.

In no way, NUEPA is involved in data collection as such as therefore the accuracy and truthfulness of the data rest with the States/UTs. The State Project Directors have certified that data is free from errors and inconsistencies and hence may be merged into the national database maintained at
